REQUEST FOR PROPOSAL (RFP)

1. Introduction

Maldives Immigration invites qualified vendors to submit proposals for the supply, installation, and commissioning of mission-critical security solutions. The objective of this RFP is to strengthen operational efficiency, enhance safety, and ensure secure information management through the deployment of modern technologies.

2. Supply, Installation, and Maintenance of a Body-Worn Camera and Evidence Management Solution

Maldives Immigration seeks a comprehensive body-worn camera (BWC) and evidence management solution. The requirement includes body-worn cameras, charging stations, a centralized device and evidence management software platform, network connectivity, and ongoing support. The software platform must be deployed on-premise to ensure data security and compliance. Vendors are expected to propose a complete turnkey solution encompassing supply, installation, and long-term maintenance.

2.1 Scope of Work

The selected vendor will be responsible for providing and implementing a fully operational BWC solution. The scope includes:

Hardware:

- Thirty-Five (35) body-worn cameras meeting the technical specifications outlined in Section 3.
- Multi-unit charging stations capable of simultaneously charging all devices and facilitating data transfer. These changing devices will be used in four (4) separate locations.

Software:

- A centralized, integrated software platform for device management, evidence management, and system administration. The software must be deployed on our on-premises virtual servers at Maldives Immigration Headquarters.

Installation and Configuration:

- Complete on-site installation of all hardware and software components.
- Configuration of the entire system, including establishing network connectivity with devices
- Ensuring the solution adheres to our internal security best practices and policies.

Network Connectivity:

- Proposal of a compatible network connectivity solution (e.g., 4G/5G) for live streaming and data transfer from BWC devices.
- A detailed breakdown of associated data costs, with options for monthly or annual billing plans where applicable.

Support and Maintenance:

- A minimum of one (1) year of comprehensive support and maintenance, commencing upon system acceptance.

Training and Documentation:

- Provision of in-depth maintenance and administration training for our IT staff.
- Delivery of complete system documentation, including all configurations, network diagrams, and user manuals.

3. Body Worn Camera Technical Requirement

#	Technical Requirement	Compliance YES / NO
1	Video Quality: High Quality recording with a minimum of 120° ultra-wide field of view to capture broad scenes clearly.	
2	Low-Light Capability: Advanced night vision support for superior performance in low-light conditions.	
3	Audio: Dual high-performance microphones with AI-based noise cancellation to capture clear audio even in noisy environments.	
4	Connectivity: Supports 5G / 4G LTE, dual-band Wi-Fi (2.4 / 5 GHz), and Bluetooth for real-time streaming, device pairing, and data offload.	
5	GPS / Positioning: Integrated support for GPS, GLONASS, Galileo, BDS, enabling real-time location tracking and geotagging of recorded evidence.	
6	Ruggedness: Rated IP67 or higher against dust and water ingress, and compliant with MIL-STD-810 for drop and shock protection in harsh operating conditions.	
7	Battery & Power: Equipped with a 3,500 mAh or higher as main battery for extended shift use (e.g. 8 hours or more recording with 5G & GPS on) plus a backup battery to maintain recording during battery swaps.	
8	Storage: Internal 64 GB (minimum) encrypted storage (ROM + RAM) for secure, tamper-resistant evidence retention.	
9	Display / Interface: Display screen for reviewing footage and checking device status.	
10	Pre-Record / Post-Record: Configurable pre-event / post-event buffer to ensure critical moments are captured before and after the user triggers recording.	
11	Security / Encryption: End-to-end security using AES-256 encryption, digital signature, and hash verification during capture, storage, and transmission to preserve integrity and chain of custody.	
12	Mounting / Accessories: Supplied with a mounting kit (clips, harness, mounting adapters) compatible with operational use, allowing flexible mounting on uniform, vest, or equipment.	

3.1 Integrated Device & Evidence Management Software

The software solution must provide the following functionalities:

- **Centralized Management:** A single, web-based interface for managing all devices, users, and evidence from a central location.
- **Role-Based Access Control:** Granular permissions to control user access to devices and evidence based on roles and responsibilities.

- Secure Evidence Storage: A secure, on-premises digital evidence repository with a comprehensive audit trail for all actions (viewing, exporting, deleting).
- Chain of Custody: Unbroken chain of custody logging from the point of capture to final disposition.
- Automated Redaction: Ability to redact faces, license plates, and other sensitive information from video footage.
- Case Management: Tools to organize evidence by case, add notes, and manage retention policies.
- Reporting: Advanced reporting capabilities on device usage, evidence collection, and system status.
- Integration: The platform should support integration with other systems via an API.

3.2 Items for the Solution

	Item Description	Unit	Quantity
1	DEM Software	KIT	1
2	IDS Software	Nos	2
3	Multi-Unit Charger (with data collection)	Nos	6
4	5G Body Worn Camera	Nos	35
5	APN Plan 100GB	Nos	35
6	APN P2P 50Mbps	Nos	1

General Terms & Conditions

- While the Central Management System (CMS) will be deployed on-premises, the supplier shall also propose an option for offsite deep storage through a certified data center, ensuring secure, compliant, and scalable data retention
- Vendors should be able to provide SIM cards with private APN configurations as part of the solution package to ensure reliable, prioritized, and secure connectivity across the Maldives.
- Vendors must commit to a 24/7 support SLA with guaranteed response and resolution times
- The solution must allow for easy scaling (adding new devices, storage, or sites) without major infrastructure changes. Proposals that demonstrate scalability.
